## International Partnership on Mitigation and MRV

Launched by South Africa, South Korea and Germany at the Petersberg Climate Dialogue in 2010, the Partnership encourages countries to improve their mitigation ambitions and carry out the transformation to a sustainable low-carbon society.

It facilitates the **exchange of good practice on mitigation-related experiences and MRV** between climate negotiators, policymakers and practitioners from more than **90 developing and developed countries** in order to share learning, build trust and inform the United Nations Climate negotiations.

## About the Partnership

The Partnership supports the design, set-up and effective implementation of

- (Intended) Nationally Determined Contributions (INDCs/NDCs);
- Low-Emission Development Strategies (LEDS);
- Nationally Appropriate Mitigation Actions (NAMAs);
- Measuring, Reporting and Verification (MRV) systems.

## Knowledge Management

**Website:** <http://mitigationpartnership.net/>

- News from the Partnership, publications and tools, events, new projects etc.
- Large resource section that bundles papers from a variety of sources on mitigation and transparency
- GPA database

**Newsletter:** <http://mitigationpartnership.net/subscribe>

- Trimonthly distribution to the Partnership members, project implementers and other interested experts
- Information about: New projects, documents, upcoming events and reports from the partner countries

**Twitter:** [http://mitigationpartnership.net/mitigation\\_mrv](http://mitigationpartnership.net/mitigation_mrv)

# Information Matters

## Transparency through Reporting

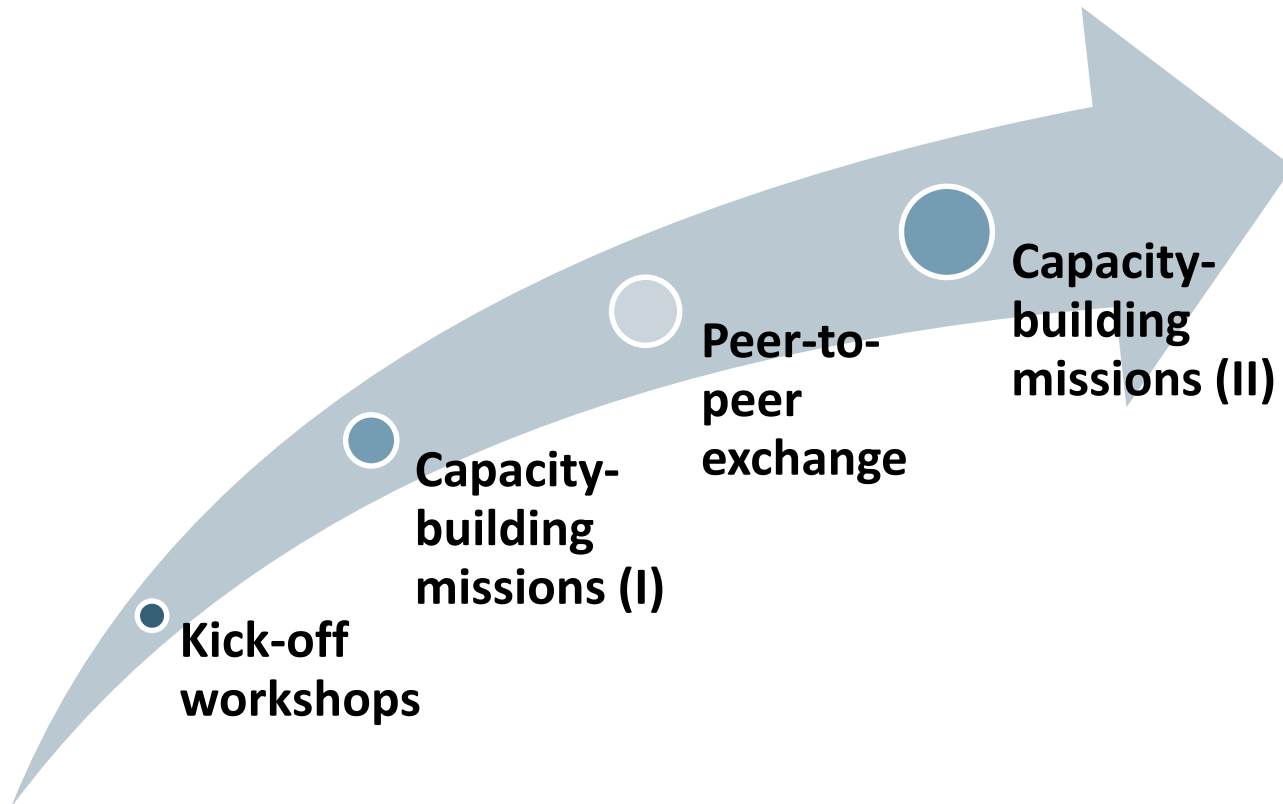

## Project content

- **Goal:** Strengthen in-country capacities for enhanced reporting on GHG mitigation to UNFCCC (Biennial Update Reports (BURs) and National Communications (NCs) in eight partner countries:
  - **Chile, Colombia, Dominican Republic, Egypt, Georgia, Ghana, Philippines, and Vietnam.**
- **Activities:**
  - Identification of specific needs and priorities of the MRV systems and GHG monitoring in the partner countries.
  - Provision of tailored-made capacity-building trainings and backstopping as well as concepts for institutionalization.
  - Support the process through peer-to-peer exchange and generation of knowledge products.

## Work in partner countries

## Knowledge products

**Stock Taking Tool**: An analytical tool that countries can apply to identify priority actions for national MRV systems.

**BUR Template**: A template developed on the basis of the UNFCCC guidelines for the preparation of biennial update reports.

**BUR Process Guidance Tool**: a six step guide that has been developed to support countries in the process of preparing a BUR and undergoing the International Consultation and Analysis (ICA).
